

The collaboration with the Architects' Association

SATPO Company has been financially supported by the Municipality of Architects, which is a successor of architectural associations from the First Republic. Under the leadership of the Architects' Association, the historical membership of the Czech Republic in UIA's world union of architects was restored in 2017, and again it was put into the protection and rights of Czech architects in the world. The Association is a cultural platform of Czech architects which provides a federal activity to promote Czech architects in the Czech Republic and abroad.

SATPO also decided to work with the Architects' Association this year as part of the Student Union project, bringing together students and student associations from the world of architecture. The cooperation will be carried out in the field of development of new proposals for the development of existing apartment buildings in Prague, in which the company owns an ownership interest.
